Objective:

Passionate Computer Engineering undergraduate with knowledge of HTML, CSS, and basic backend concepts. Experienced in building small academic projects and debugging code. Fast learner, team-oriented, and eager to apply academic knowledge to real-world work through an internship.

Education:

Examination	Board	Academic Year	% Marks
Diploma Semester- III	Maharashtra State Board of Technical Education	2025-26	86.50%
Diploma Semester- II	Maharashtra State Board of Technical Education	2024-25	89.06%
Diploma Semester- I	Maharashtra State Board of Technical Education	2024-25	90.00%
FYJC (11 th)	MSBSHSE	2023-24	72.00%
SSC	Maharashtra State Board of Secondary & Higher Secondary Education	2022-23	89.80%

Projects Undertaken:

1. Email Spam Detection Using Machine Learning:

2025

Python, Data Preprocessing, Text Vectorization (TF-IDF), Classification Algorithms, Model Evaluation (Accuracy)

- ✓ This project focuses on Email Spam Detection using Machine Learning techniques implemented in Python.
- ✓ The system uses data analytics to collect and preprocess email data, where text messages are cleaned and converted into numerical features using the TF-IDF vectorization technique.
- ✓ Various machine learning classification algorithms such as Logistic Regression, K-Nearest Neighbors (KNN), and Naive Bayes are applied to identify whether an email is spam or non-spam (ham).
- ✓ The performance of each model is evaluated using accuracy, helping in selecting the most effective algorithm for spam detection.
- ✓ This automated system helps in reducing unwanted emails and improves the reliability and efficiency of email communication.

2. Career Suggestions Based On Interest

2026

Python, Functions, Nested Functions, Conditional Statements, Menu-Driven Programming

- ✓ This project focuses on developing a menu-driven Career Guidance System using Python to help students explore academic and career options after 10th, 12th, Diploma, and Degree.

- ✓ The system is designed using modular programming, where separate functions handle different education levels and career paths.
- ✓ Nested functions are used to display detailed subject combinations (PCM, PCB, PCMB) along with career opportunities in Science, Commerce, Arts, and Diploma streams.
- ✓ The application uses conditional statements and loops to process user input and provide interactive, decision-based guidance.
- ✓ This project improves understanding of Python control structures and provides a practical tool for students to make informed career decisions.

Internship:

1. AIML & Machine Learning Intern

2025

IBase Electrosoft

10 days

- ✓ Learned Algorithms of Machine Learning like □ Linear Regression, Logistic Regression, KNN, Gaussian Naïve Bayes.
- ✓ Developed and evaluated ML project for Email Spam Detection using Python.

2. Python Development Intern

2025

IBase Electrosoft

7 days

- ✓ Built Python program of Online Banking System and analyzed real-world datasets using Pandas and NumPy.
- ✓ Learned Basic Python Concepts.

Certificates:

- ✓ Completed certified internship in Python Programming.
- ✓ Completed certified internship in C Programming.
- ✓ Completed certified internship as AIML Trainee.

Achievements:

- ✓ Achived 4 Exam Certificates of 'Akhil Bharatiya Gandharva Mahavidyalay Mandal, Mumbai' for Kathak Dance.
- ✓ Achived Intermediate, Elementary Exam certificates of Drawing.

Skill:

- ✓ HTML(Basics)
- ✓ CSS(Basics)
- ✓ C
- ✓ C++
- ✓ Python
- ✓ Java(Basics)
- ✓ Database Management
- ✓ DSA(Basics)

Strengths:

- ✓ Can Work on Excel, Word, Powerpoint, etc.
- ✓ Ability to Mange Events and Projects.
- ✓ Average at Coding.
